

VIM for Document Processing FasTrak

Fast track the processing of incoming SAP document-driven processes by rapidly deploying OpenText VIM for Document Processing

Solid foundation—
Lay a foundation that allows continual process improvement

Go live faster—
Get a return on your solution investment in as little as 12 weeks

20+ years—
Leverage extensive SAP document business process & solution knowledge

Many business processes (such as, but not limited to, Procure to Pay, Human Resources and Order to Cash) begin with the receiving of a document. Businesses spend significant effort entering, validating and matching data from these received documents, verifying duplicates, and spending a lot of time on what otherwise should be routine processing. Often, issues uncovered with a document require multiple touches before the right person or department best suited to resolve the issue receives it. All of these elements slow the process down.

Based on 20 years of experience in document-driven processing, OpenText Professional Services help customers quickly deploy a solid foundation which can be enhanced and improved upon in the future. The FasTrak Service package helps implement a solution for a single SAP business document type in approximately 12 weeks. The package helps organizations transform the user experience for employees and managers while simplifying user adoption.

"We worked closely with OpenText Professional Services throughout the design and implementation of the new applications. Their support has been invaluable in helping us achieve our goals of control and flexibility and we're now extremely well placed to maximize the benefits provided by the solution."

Finance and Business Analyst
Sysmex Europe

Solid Foundation

Reduce the time-to-value for solution investments and yield opportunities to learn from the initial use of the solution. Once the foundation is deployed, more nuanced requirements and opportunities to further leverage the solution help organizations to optimize document processing.

Go Live Faster

The FasTrak Services Package can help organizations to start receiving a return on their solution investment in as little as 12 weeks using a foundation-first approach. Accelerating the initial deployment mitigates risks associated with longer and more costly projects.

20+ years

Leveraging more than 20 years experience in SAP document-driven business processing, OpenText's Professional Services experience, coupled with the configuration capabilities of the software, minimize the need for customizations.

Knowledge transfer to the customer's project team is included in this service to enable a smooth solution transition to the customer and further the utilization of SAP document processing within the organization. Additional comprehensive product training and certification is also available from OpenText as project add-ons.

OpenText Professional Services has the world's largest pool of EIM experts who are certified on OpenText products and solutions. This brings flexibility to the resourcing process, offering customers a mix of in-region and off-shore expertise. OpenText teams are aligned to your preferred engagement model which can include up to 100% remote delivery. The Professional Services organization has over 3,000 people and the Ecosystems center of excellence has over 130 consultants globally with domain expertise and deep relationships with technology partners including SAP.

OpenText delivers as one team! Professional Services has unparalleled access to our Customer Support and Product Engineering teams who have mutual accountability to customer success and satisfaction. Customers benefit from this one-team accountability and innovative problem-solving commitment.
